

A SYSTEM FOR IMPROVING DIGITAL COPIERS
AND MULTIFUNCTION PERIPHERAL DEVICES

5

ABSTRACT OF THE DISCLOSURE

A digital copier or multifunction peripheral (MFP) can perform special document construction functions including "auto-sizing," scaling a copy to fit a
10 selected size of copy medium, and "auto-cloning" printing a plurality of copies of a single original on a copy medium. The size of the original image is determined from the results of a full resolution scan of the original.
